request

retrieve and display

request.getXXXX()

```
@WebServlet("/first")
public class FirstServlet extends HttpServlet {
    private static final long serialVersionUID = 1L;

    public void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {
        PrintWriter out = response.getWriter();
        out.println("<h1>Response from First Servlet...</h1>");

        RequestDispatcher requestDispatcher = request.getRequestDispatcher("/second");
        requestDispatcher.forward(request, response);

        out.close();
    }
}
```

```
@WebServlet("/second")
public class SecondServlet extends HttpServlet {
    private static final long serialVersionUID = 1L;

    public void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {
        PrintWriter out = response.getWriter();
        out.println("<h1>Response from Second Servlet...</h1>");
        out.close();
    }
}
```
