

SessionTracking[Old request data can also be processed in new request data]

nitin ----> Flipkart Application(java)

1. request -----> Core java text book ----> 500 ----> total order ----> 1 ---> money to be paid ---> 500  
(request)
2. request -----> Advanced java text book ---> 600 ----> total order ---> 2 ---> money to be paid --> 600 + 500  
(request)

use concept of session tracking mechanism

SERVLET(Controller) + JDBC(persistence logic) + JSP(for view)
